Replacement-review worksheet

Blank worksheet only. Not a product datasheet, calibration certificate, dimensional drawing or signed quotation.

Company / project: _____

Original instrument

Manufacturer, complete model suffix, range and pressure reference

---

Original datasheet revision and previous calibration record

Pressure mount versus electrical connector; seal and diaphragm position

---

Proposed configuration acceptance

Pressure, sensitivity, excitation, output, polarity and pinout

---

Operating / compensated / short-duration temperatures and medium

---

Installed response, uncertainty and required calibration scope

---

Mechanical drawing revision and written compatibility decision

---
